About Ridge Hill Contractors

Ridge Hill Contractors (RHC) specializes in both residential and commercial infrastructure as well as water utilities construction in public and private sectors throughout southwest Missouri, northwest Arkansas, northeast Oklahoma, and east Kansas. RHC has been in operation for seven years with a business office maintained in Nixa, Missouri, a field office in Highlandville, Missouri, and a shop in Spokane, Missouri.

During our operation, we have never failed to finish a project on time and within budget regardless of the job size. We have an excellent history of on-the-job safety, and we provide continued training to all laborers and operators. Recent and current projects include sewer and water line installations, wastewater treatment plants, and earth work.

We are proud to work every day with an excellent group of motivated and talented individuals who comprise the core of our company. With various backgrounds and levels of experience in many fields, we cover every area of utility construction and then some.

Key Personnel

We are proud to work everyday with an excellent group of motivated and talented individuals who comprise the core of our company. With various backgrounds and levels of experience in many fields, we cover every area of utility construction and then some. We have an excellent history of on-the-job safety, and we provide continued training to all laborers and operators. All of our field workers have completed the OSHA 10 safety training requirements for federal and state funded projects. We are members of the Local 101 Operating Engineers Union and the Local 663 Laborers Union.

Name	Title	Skills	Experience
Tony Adams	Superintendent	Operator / Pipe Fitter	12 years
